

Qventus Perioperative Solution

In operating rooms across the nation, we have witnessed the rapid need for adaptability and agility to serve the dynamic nature of supply and demand. End users expect simplicity and personalization in their professional tools and reducing their manual workload remains a top priority. However, the industry struggles to achieve sustained engagement, while the need to deploy automated and diverse growth strategies continues to rise.

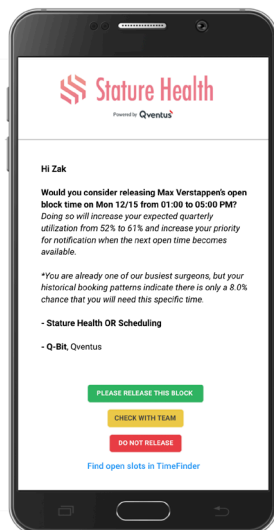

The Qventus Perioperative Solution solves these challenges by leveraging the latest innovations in AI, machine learning, and behavioral science, to bring a more personalized and automated experience to each stakeholder.

- **Established surgeons** release unused blocks proactively ahead of auto-release.
- **Independent surgeons** gain OR access and are less likely to take cases elsewhere.
- **OR schedulers** maximize OR time efficiently with reduced manual coordination.
- **Surgeon schedulers** can easily find best-fit times and submit and track case requests.
- **Executives** have 360° views of performance and market insights to drive growth.

Three Integrated Modules Engineered to Increase Access, Accelerate Growth, and Surface Actionable Insights

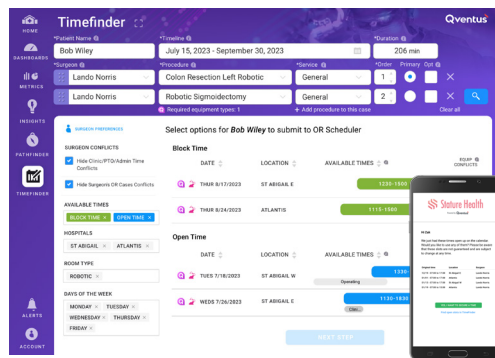

Access

Maximizes OR utilization by proactively unlocking capacity and time.

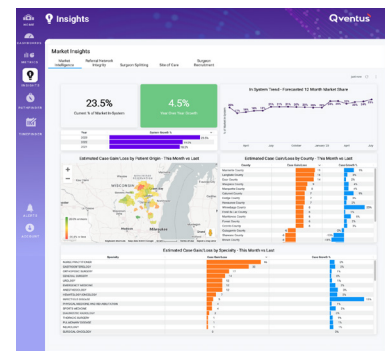

Growth

Grows strategic case volume by engaging with surgeons and schedulers.

Insights

Surfaces relevant and personalized market data and performance insights.

All-In-One Solution for the OR

Block

Maximizes block by predicting hourly slots of unused time and incentivizes proactive release.

TimeFinder

Boosts access for all surgeons through an intelligent marketplace for requesting OR time.

OR Insights

Surfaces actionable performance insights tailored for surgeons, OR leaders, and executives.

Robotics Optimization

Optimizes your robotics program with curated insights and by increasing access for the right cases.

Available Time Outreach

Increases valuable case volume by strategically marketing popular time slots to the best-fit surgeons.

Market Insights

Uncovers deep insights on market share, referral network, surgeon splitting, site of care, etc.

The Qventus Difference

- ✓ Proven AI and machine learning from 12+ years of experience.
- ✓ One-to-one personalization to drive engagement with nudges.
- ✓ Optimize robotics program with key industry partnership.
- ✓ Bi-directional EHR integration to reduce manual work.
- ✓ Optimize for supply and demand to strategically find and fill time.
- ✓ Expanded market and referral data to deeply learn behavioral patterns.
- ✓ Superior implementation and maintenance delivery.
- ✓ Unified platform architecture to launch new innovations.

Qventus Delivers Impactful Outcomes

Breakeven
within 3 months of
going live

35%
increase in
robotic cases

50%
utilization of early
released block

Up to 3+
cases added per
OR per month
